Abstract

The text of your abstract. 200 or fewer words.

Keywords: 3 to 6 keywords, that do not appear in the title

^{*}The authors gratefully acknowledge \dots

Figure 1: A plot example

1 Introduction

This template demonstrates some of the basic latex you'll need to know to create a ASA article. It is built from template find at Journal of the American Statistical Association instruction for authors

1.1 Plot

Plot example - LaTeX floating to be adjusted if you don't want it.

1.2 Table

Table example

dist	speed
2	4
10	4
4	7
22	7
16	8
10	9

1.3 Various guidelines

- Note that figures and tables should appear in the paper, not at the end or in separate files.
- Remember that in the blind version, you should not identify authors indirectly in the text. That is, don't say "In Smith et. al. (2009) we showed that ...". Instead, say "Smith et. al. (2009) showed that ...".
- These points are only intended to remind you of some requirements. Please refer to the instructions for authors at http://amstat.tandfonline.com/action/authorSubmission?journalCode=uasa20&page=instructions#.VFkk7fnF_0c
- For more about ASA style, please see http://journals.taylorandfrancis.com/amstat/asa-style-guide/
- If you have supplementary material (e.g., software, data, technical proofs), identify them in the section below. In early stages of the submission process, you may be unsure what to include as supplementary material. Don't worry—this is something that can be worked out at later stages.

2 Methods

Don't take any of these section titles seriously. They're just for illustration.

3 Verifications

This section will be just long enough to illustrate what a full page of text looks like, for margins and spacing.

See Campbell and Austin (2002) and Schubert et al. (2013) or (Chi et al., 1981)

The quick brown fox jumped over the lazy dog. The quick brown fox jumped over the lazy dog. The quick brown fox jumped over the lazy dog. The quick brown fox jumped over the lazy dog.

4 Conclusion

SUPPLEMENTARY MATERIAL

Use definition list syntax in this part

Title: Brief description. (file type)

R-package for MYNEW routine: R-package MYNEW containing code to perform the diagnostic methods described in the article. The package also contains all datasets used as examples in the article. (GNU zipped tar file)

HIV data set: Data set used in the illustration of MYNEW method in Section 3.2. (.txt file)

5 Bibliography.

Using natbib is the default with this format, using plain.bst by default on the template, and apalike.bst in this Rmd skeleton. Chante to your preference using the biblio-style in YAML
